

Finger Defender

Trade Name: ASTRO FINGER DEFENDER

Prevents fingers being trapped in gap between frame and rear edge of door

Acts as a light door closing mechanism

Extremely durable and maintenance free

Tested to over 1 million open & closing cycles

Fits any door up to 180° opening

Suitable for Automatic Doors

Impact resistant

Suitable for most single or double-action doors

Silver finish or any RAL number colour.

Description

Doors are used everyday by everybody but they are potentially dangerous and according to RoSPA there are over 30,000 finger injuries every year.

Teachers, parents, and carers have become increasingly aware of the danger of children trapping their fingers in closing doors and to avoid accidents recent legislation BS7036 Part 4: item 7.1 recommends "the use of a finger defender that either fills the finger trap or minimises the gap so as not to create a finger trap.

Astro Finger Defender is a high quality, resilient blind that prevents fingers entering the cavity formed between the edge of the door and door frame. The blind is mounted in a robust aluminium housing unlike a concertina style blind, which is constantly exposed and can suffer damage as a result. A robust housing protects Astro Finger Defender when not in use.

Independently tested to over 1 million opening & closing cycles and prevents fingers entering the cavity formed between the door and the frame by means of an inflammable blind, which opens and closes with the action of the door.

The robust housing protects the blind when not in use. It has concealed screw fixings and comes complete with end caps for that even neater finish.

Availability

Lengths : 1925 mm

Colours: Silver Anodised finish or White or Colour coated to any Colour

Available to order in any quantity, except RAL colours, which are subject to minimum order quantity.
