New build or refurbishment

Ideal for use in Healthcare, Retail, Schools and Commercial/Public areas

Description

Doors in hospitals suffer more than most from wear and tear resulting from high traffic levels and impact damage yet any door in a commercial or industrial building is likely to suffer from this loss of integrity.

With constant trolley and wheelchair traffic it is the leading edge of the door that suffers most from 'porter damage' which not only results in general damage to the door but also possible loss of the fire integrity of the door.

Astroflame have overcome this problem with their range of Fire rated Door Edge Guards which are available in various sizes from 44– 65mm width and lengths up to 3m with longer lengths available for non-standard doors.

Door Edge Guards contain intumescent & smoke seals and have been fully fire tested up to 1/2 or 1 hours and eliminate the need for repetitive maintenance.

Available in aluminium or PVC Colours up to 3m long & Widely specified throughout the UK healthcare market.

Converts leaf stile doors to swing stiles

Impact tested to 200kg at 3.5 m.p.h and 50kg at 7m.p.h

Availability

Length

Standard Length 2100mm - Longer lengths to order up to 2.5m
