Raven Products Door Bottom Smoke Seals

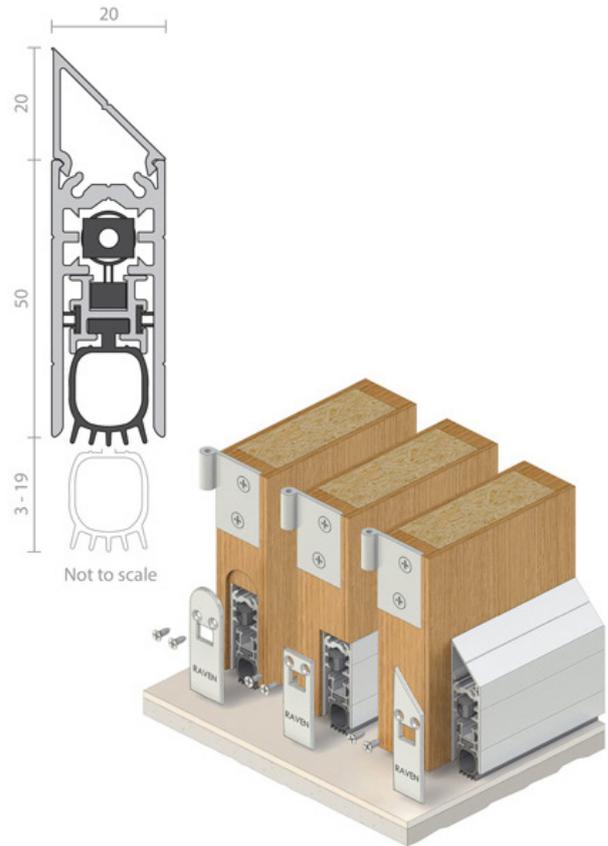

Revision 6 - 1st March 2021

Raven Products Smoke Seals

Door Bottom Smoke Seals

- Raven Door Sealing Systems are available to combat draughts, dust, rain, noise, heat loss, heat gain, fire, smoke and stray light.
- With solutions for a wide range of door opening types including butt hinged, up and over, sliding, roller shutter and revolving.
- The following is a selection of the Raven Smoke
- Rated Seals available from the comprehensive range shown on www.astrodraft.com.

Product Description

Raven Seals have been designed to accommodate a variety of duty levels, classified on this web site as light, medium and heavy.

L Light Duty seals include those typically used in residential applications or light traffic areas.

M Medium Duty seals are used in commercial applications such as office spaces, shops, commercial accommodation or medium trafficked areas.

H Heavy Duty seals are designed for areas with a high level of use such as public places such as hospitals, airports, factories, shopping centres or areas with a large flow through of pedestrian and wheeled traffic.

Product Description

H RP8Si

RP8Si is spring loaded to lift clear of the floor as soon as the door leaf is opened by a few millimetres.

BS EN ISO 717.1

Mounted into a 15mm x 34mm groove that has been mortised into the bottom edge of the door, it is operated automatically by pressure against the door jamb on its adjusting screw.

RP8Si has been tested for durability 1,000,000 cycles completed without failure.

Location

Single and double, butt hinged doors.

Min/Max Gap 3mm/13mm.

Fixing Method

Concealed, with supporting colour matched stainless steel escutcheon plates. Screws supplied

Seal Material

Silicon rubber (SE) (Charcoal)

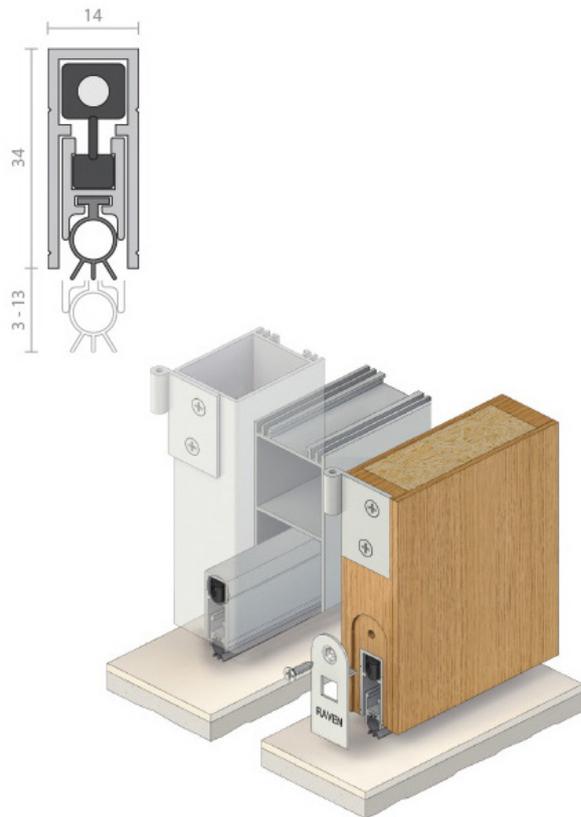

Replacement Seal RP308si.

Optional

Stainless steel rounded escutcheon plate RP8cp2(clear)
RP8bp2(bronze).

Escutcheon plate dimensions

Rounded: 22mm wide, 57mm high, (22mm dia router bit)
1.2mm thick Rectangular: 22mm wide, 60mm high, 1.2mm thick

Product Description

H RP70Si

The RP70Si automatic seal is the fully mortised version of the RP38Si door seal. It is a heavy duty door bottom seal which is spring loaded to lift clear of the floor as soon as the door leaf is opened by a few millimetres.

The seal is operated automatically by pressure against the door jamb on the adjusting screw. It seals when the door closes and retracts automatically when door is opened. It is self leveling.

When using RP70si door bottom seal, the door must be a minimum of 45mm thick and of suitable construction for mortising this seal. It is reversible for left or right handed operation.

Note: For double doors, plain meeting stiles are required.

RP70Si has been tested for durability ~ 1,000,000 cycles completed without failure.

Location

Single or double, butt hinged doors., minimum thickness 45mm.

Min/Max Gap 3mm to 13mm.

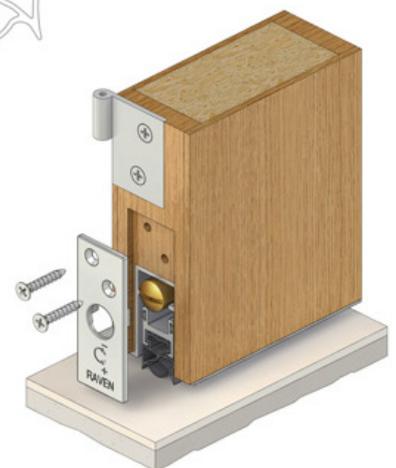

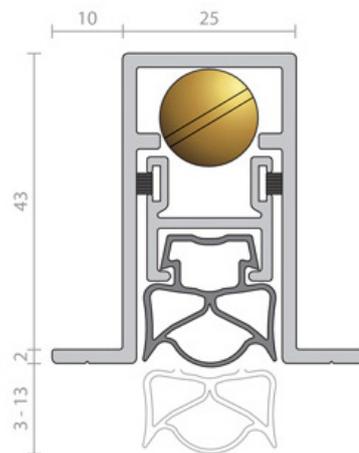

Fixing Method

Fully mortised, can be adjusted, escutcheon plates provided.

Seal Material

Silicon rubber (SE) (charcoal colour)

Replacement Seal RP338si.

Installation

We have technical representatives who provide assistance in the selection and specification of the products on this site and should be consulted for exact installation and product suitability. Ensure an early engagement with ourselves, designers, main contractor and specialist installers before any installation. Other trades and/or manufacturers may need to be consulted. For in-depth information, specification and technical advice please call our Head Office on tel [01329 844 500](tel:01329844500) or email sales@astroflame.com

Maintenance

All interested parties, designer, specifier, main contractor and specialist installers should provide access to allow the fire stopping seals to be regularly inspected and maintained, as well as records kept of such maintenance at minimum periods of 12 months, as required by the Regulatory Reform Order, and repaired if necessary. Reference should be made to ASFP TGD 17 – Code of Practice for the Installation and Inspection of Fire Stopping.

Competency

It is vital that those entrusted to design or install a fire stopping product have the necessary levels of competence to undertake the task professionally and thoroughly. The level of competency required will be commensurate with the expected complexity of the building. All designers must eliminate, reduce or control foreseeable risks that may arise during installation, construction or maintenance when preparing or modifying designs. Clients should ensure that the principal designer and principal contractor carry out their duties under CDM regulations. The ASFP foundation course in passive fire protection provides essential knowledge as part of demonstrating competency and understanding in this key fire protection specialism.

Additional Notes

For further information on installation requirements please refer to the door manufacturer data to ensure the compatibility of this product, if in doubt please contact the technical team on tel [01329 844 500](tel:01329844500) or email sales@astroflame.com

Health and Safety
