- Low maintenance needs.
- Retrofits to existing doors.
- Quick Installation with normal hand tools.

The finger guard in action.

Product Description

AluSlide is a heavy duty finger guard for doors in high traffic areas. The all aluminium construction makes this guard suitable for situations where plastic types will prove uneconomical in the longer term.

In heavy duty environments plastic guards may need replacing within 6 - 24 months of installation whereas this guard will perform as intended for years. The smooth surface design makes for easy wipe-down cleaning. The rigidity of the guard prevents it from deflecting even under persistent finger pressure. slide rails for door guard.

The door surface material must be able to accept 25mm No. 8 screws. The main body of the finger guard is fixed to the door frame at one side and the other side slides across two runner plates fixed to the doors. Comes complete with fitting kit and instructions.
