Product Description

Astro FingerKeeper Rearguard prevents finger trapping accidents by totally covering the gap that is created on the rear hinge side of a door when it is in the open position. The Astro FingerKeeper Rearguard device can be fitted to most types of doors including wood, metal and uPVC.

Used in conjunction with **Astro FingerKeeper Commercial Front**, which covers the front hinges, the risk of finger trapping accidents on the hinge edge of the door is eliminated. The device is considered to be environmentally friendly. Simple to install, with a long life expectancy and easily removed and refitted without glue or nails. Screws are recommended (and supplied) for heavily traffic areas.

Every year, according to RoSPA, over 30,000 children are injured in the UK as a result of trapping their fingers in doors.
